Company Name: WildCard (https://wildcards.world/)

(City,state | July 2020~Current)

I am currently building a NFT Game project using Blockchain, Web and Unity.

I developed several NFT and Dapp projects on ETH polygon chain and Solana and bots for sale monitoring bot for opensea and Niftygateway.

- -several types of token(ERC20/BEP20, ERC721/ERC1155) development -DEX fork, Defi platform for Staking / Yield farm / Lending & borrowing system / NFT marketplace .
- -minting by user randomly NFTs, Upload the NFT arts and Traits(metadata) to IPFS -NFT minting site on polygon with NFTs using metaplex in Solana Network,
- Metamask and Phantom integration(Solana),
- -minter in candy machine and were opting in for metaplex, 10% royalty moved to burn and other wallets
- -10% royalty moved to burn and other wallets so burn mechanism with kind of sharing rewards back to the holders
- -smart contract for the nft marketplace using spl token instead of sol.

Company Name: Badger DAO (https://app.badger.com/) (City,state| April 2019~June 2021)

I developed several cryptocurrencies using following technologies and tools.

- typescript/react
- node.js, mongodb
- Solidity DApps and smart contracts (ERC20, ERC721, ERC1155, BEP20)
- Binance Smart Chain
- GraphQL
- NFT, IPFS, opensea.io
- web3j / web3.js / Ethereum
- Truffle Framework
- -Hardhat
- Remix

Company Name: Monters Clan (https://www.monstersclan.com/) (City,state | April 2018~September 2020)

Performed initial client assessment and analysis to begin research process. Supported Chief Operating Officer with daily operational functions. defined the structure of the Blockchain Development for the Product team and defined the Access controls and security and environment for the Almaty. Designed and developed the smart contracts using the Solidity and implemented test scripts on the smart contracts using the truffle framework. optimized the smart contract code and increased the efficiency by 15%, using the Library functionalities of the solidity. successfully reached the phase-1 of the Project.

Company Name: Reef (https://reef.io/)

(City,state| May 2018~June 2019)

Developing the REST- based services to improve the user- experience with respect to interaction.

Participated in POC's, to apply the Blockchain Technology into the Job boar application. writing and deploying the smart contracts on solidity and platform - Ethereum.

EDUCATION

Software Engineering

National University of Singapore (2014-2018)

Bachelor of Computing in Compute Science

- Relevant Coursework: Programming Methodology, Discrete Structures, Data Structures and Algorithms, Computer Orgamisation, Software Engineering, Introduction to Computer Networks, Introduction to Operating Systems, Introducton to Information security
- GCE'A'Level, Integrated Programme (IP), Hwa Chong Institution
- Recived the Hwa Chong Outstanding Student Award in 2015
